### Dermatopathology Clinicopathological Correlations

Dermatopathology: Clinicopathological Correlations is a comprehensive but concise visual reference that contains specific features on the various clinical findings and histologic findings of skin diseases. It emphasizes criteria for diagnosis to help the trainee pathologist or dermatologist decipher the most important features and make clinical decisions quickly and effectively.

### Dermatopathology: Clinicopathological Correlations ...

Clinicopathological correlation is often the basis of accurate dermatopathological diagnosis. But who should perform this correlation? The dermatologist, the dermatopathologist or both? In my experience, in difficult cases, particularly when no clinical information is given, the pathologist often writes a descriptive report followed by the phrase "œclinicopathological correlation is required" .

### **Dermatopathology Clinicopathological Correlations [PDF]**

Over half of cases lacking clinicopathological correlation (11 out of 21) involved clinically suspected or microscopically confirmed KS. In 10 cases, KS was suspected clinically but revealed different disease processes histologically. Three of these 10 cases represent lichenoid tissue reactions with prominent pigment incontinence on histology.
