Fish Pathology 4th Edition Research And Markets

The book has established itself as a course text and source of reference, so this new edition has had a solid foundation upon which to build. Ron Roberts has edited the fourth edition of Fish Pathology and has written several of the chapters, but he has had a number of collaborators, including Ron Hardy, Chris Secombes, Rod Wootten and (the late) Tony Ellis.

Fluorescence in situ hybridization (FISH) is a powerful and robust technique allowing the visualization of target sequences like genes in interphase nuclei. It is widely used in routine diagnostics to identify cancer-specific aberrations including lymphoma-associated translocations or gene copy number changes in single tumor cells.

FISH and FICTION in Lymphoma Research | SpringerLink

Within the department, research methods, cases, training meetings about new techniques, various research and thesis study seminars are held regularly. In addition, tumor, gynecology, breast, endocrine and bone councils are organized for weekly clinic-pathology meetings with the related departments.
