algebra mean? - Answers

Example 1: Consider the equation $25x - 35 = 5(5x + 4) - 55$. On solving we have $25x - 35 = 25x + 20 - 55$ or $25x - 35 = 25x - 35$. Subtracting $25x$ from both sides, $25x - 25x - 35 = 25x - 25x - 35$. We have $-35 = -35$, which is a True statement & it will be true for any value of the variable x . Hence the given linear
