The ocean often feels like a great mystery, with strange creatures living in its depths—but it is key to life on this planet. The first signs of life appeared in the ocean some 3.5 billion years ago, and through the ages those initial single-celled organisms evolved into the variety of life we see today, on land as well as in the sea.

Miami Beach Senior High School / Overview

Miami Beach Senior High School / Overview

Earth's oceans are teeming with life, which creates changes in ocean color that are visible from space. Tiny plants, phytoplankton, bloom for hundreds of miles, coloring the oceans and giving us clues about complex marine ecosystems. Driven by wind, temperature, salinity, and other forces, currents on the ocean surface cover our planet.

NASA: Ocean Worlds

Life On An Ocean Planet. Description : Table of contents includes: Importance of ocean exploration -- The foundation of life in the ocean -- A water world -- The motion of the ocean -- Voyage to the bottom of the sea -- The present and future of the marine environment.

Life On An Ocean Planet PPT | Xpowerpoint

From massive marine mammals like whales to the tiny krill that form the bottom of the food chain, all life in the ocean is interconnected. While the ocean seems vast and unending, it is, in fact, finite; as the climate continues to change, we are learning more about those limits.

Why the Ocean Matters | National Geographic Society

Life on an Ocean Planet. Chapter 1 Page 1-3. 3 The Ocean Planet. The oceans produce two influences vital to life on Earth. Weather and world climate patterns dictate how warm, cold, wet, or dry it will be. This largely determines where humans live on land. In addition, the oceans provide three important marine resources Food Oxygen Natural

An ocean planet (also called a waterworld) is a type of planet whose surface is completely covered with an ocean of water. Planetary objects which form in the outer Solar System begin as a comet-like mixture of roughly half water and half rock by mass. Simulations of Solar System formation have shown that planets are likely to migrate inward and outward as they form, presenting the ...
