OBJECTIVE: Financial conflict of interest has been reported to be prevalent in clinical trials in general medicine and associated with a greater likelihood of reporting results favorable to the intervention being studied. The extent and implications of industry sponsorship and financial conflict of interest in psychiatric clinical trials have not been investigated, to the authors' knowledge.

Industry Sponsorship and Financial Conflict of Interest in ...

OBJECTIVE: Patients with schizophrenia spectrum disorders have been shown to have deficits in sensorimotor gating as assessed by prepulse inhibition of the startle response. The authors hypothesized that nonschizophrenic relatives of patients with schizophrenia would also have prepulse inhibition deficits, thereby reflecting a genetically transmitted susceptibility to sensorimotor gating deficits.
