She believes that Nutrition Focused Physical Exam is an essential skill for clinicians working with pediatric patients and will allow for earlier identification and treatment of malnutrition, resulting in better outcomes and overall health.

Pediatric Nutrition Focused Physical Exam

Pediatric physical examination is an important procedure done among children starting from newborn to the other growth stages. It differs from the physical examination carried out for adults, as the disease pattern, method, and the content of the examination varies for children.

Most healthcare disciplines perform a physical exam of their patients, and a NFPE should be part of the nutrition clinician's skill set. This handbook discusses the components of the NFPE and includes pictorial representations of various stages of muscle and fat depletion (normal-mild-moderate-severe), vitamin and mineral losses, and fluid balance.
