To drive a car with an automatic transmission, first start the car with your right foot pushed down on the brake pedal. Then, switch the gear lever from "park" to "drive" without letting up on the brake. Check your surroundings to make sure there aren't any people, cars, or animals nearby, then slowly release the brake pedal to start moving ...

How to Drive a Car With an Automatic Transmission: 15 Steps

The first thing to do is change the transmission oil. Most cars use a type of oil which has solvent mixed into the oil. As the solvent evaporates, the viscosity increases and the oil becomes too thick. On old cars, adding a transmission additive would work great in many cases. On a CVT Transmission, doing that would void the warranty.
