emergence of BSE (Bovine Spongiform Encephalopathy, a fatal neurological disorder of adult cattle) emergence of vCJD (variant Creutzfeldt-Jakob Disease, a human transmissible spongiform encephalopathy) adequacy of responses to the disease. The inquiry followed the widespread belief that the government and its scientific advisers had handled the emergence of BSE badly and that public trust had been undermined.

BSE outbreak: inquiry report | Policy Navigator

The BSE Inquiry was a massive undertaking. Lord Phillips and his team spent nearly three years examining what happened day by day during the ten years that led up to the announcement of 20 March...

Ministry of Agriculture, Fisheries and Food: BSE Inquiry ...

The results of the UK government's BSE Inquiry were published on Thursday 26 October, implicating civil servants and scientists in the health scandal.

BSE Inquiry out in the open | The Scientist Magazine®

The Inquiry's report was published as a Return to an order of the Honourable House of Commons dated October 2000 for the Report, evidence and supporting papers of the Inquiry into the emergence and...

Records of the Inquiry into BSE | The National Archives

Cases of BSE peaked between 1992 and 1993, with 3 in every 1000 cows affected. The incidence began to decline in 1993, and in March, the government's Chief Medical Officer repeated the 1990 ...

BSE disaster: the history | New Scientist

The Phillips inquiry into bovine spongiform encephalopathy (BSE) and variant Creutzfeldt-Jakob disease (vCJD) reported last week (see News, p 1579). The mass media sought the guilty in the findings but the report, if anything, seeks to apportion blame to government departments or committees and systems of communication rather than to individuals. We will look at three important areas.

The Phillips report on BSE and vCJD - The Lancet

BSE Inquiry is set up to "reveal the events and decisions which led to the spread of CJD and BSE". It is due to report by the end if 1998 December 1997 : The sale of beef on the bone is banned in...

BBC News | BSE Inquiry

THE official inquiry report into the BSE crisis will strongly criticise John Major's government for failing to react swiftly enough to scientists' findings that the disease could spread to humans.

BSE inquiry will say ministers were to blame for beef ...

The United Kingdom BSE outbreak was a widespread occurrence of bovine spongiform encephalopathy (also known as BSE or mad cow disease) that affected cows in the United Kingdom in the 1980s and 1990s. Over four million cows were slaughtered in an effort to contain the outbreak, and 177 people died after contracting variant Creutzfeldt-Jakob disease (vCJD) through eating infected beef.

United Kingdom BSE outbreak - Wikipedia

The basic science of prion diseases such as BSEand vCJD, as well as the epidemiology of real-life outbreaks, has made considerable strides since 1996, where the inquiry leaves off. Although new...

The BSE Inquiry - Wait for it | Britain | The Economist

The recently released report of the "Inquiry into BSE and variant CJD in the United Kingdom" criticizes, among others, the UK Ministry of Agriculture, Fisheries and Food for imposing an embargo on releasing the finding, in 1987, that some cattle in the UK were infected with BSE. 5 Lord Phillips, chair of the inquiry, was also critical of the government, expert committees and officials such as Sir Donald Acheson, chief medical officer at the time, for not fully informing the public of ...

From nannyism to public disclosure: the BSE Inquiry report

The inquiry into the UK Government's handling of the foot-and-mouth epidemic is published on Monday. This report into last year's outbreak is the last of three ordered after the epidemic which is thought to have cost the nation £8bn. Here are the key findings in the Lessons To Be Learned report:

BBC NEWS | UK | At-a-glance: The Anderson inquiry

An alternative explanation proposed in the recent Report of the BSE Inquiry (6) is that a pathogenic mutation occurred in cattle in the 1970s. Either of these two hypotheses satisfies the need for an etiologic "seed" to survive the altered rendering process and escalate through recycling of an ever-larger number of infected carcasses.

Bovine Spongiform Encephalopathy and Variant Creutzfeldt ...

Bovine spongiform encephalopathy (BSE), commonly known as mad cow disease, is a neurodegenerative disease of cattle. Symptoms include abnormal behavior, trouble walking, and weight loss. Later in the course of the disease the cow becomes unable to move. The time between infection and onset of symptoms is generally four to five years.

Bovine spongiform encephalopathy - Wikipedia

22 Dec 1997: BSE Inquiry set up. 26 Oct 2000: BSE Inquiry report published. 28 Oct 2000: European Union approves a massive testing programme for BSE - up to six million cattle ...
